

It is designed to offer the highest quality to your listeners / audience

Maximum confidence for you. Total reliability since 1995

	<p>Chassis 2U for 19" inches rack + AERadio Professional</p> <p>AERadio Professional is installed, configured and ready to work inside our 2U chassis (it fits in your 19 inches rack). Windows Vista or XP is installed according to customized specifications. These components decide the final price of the hardware. Consult us directly or do it through a nearby dealer/our distribution network</p>
	<p>Chassis 3U for 19" inches rack + AERadio Professional</p> <p>Same case, but your PC is assembled with a 3U chassis that let you insert PCI cards of standard measure (like soundblaster soundcards or similar ones) The chassis includes a standard power supply unit. Installation of 5 ¼ inches devices is allowed.</p>
	<p>First brand PC or Portable PC + AERadio Professional</p> <p>Consult directly about this option, or do it through a nearby dealer // our distribution network. (Sony, Acer, Toshiba,...)</p>
	<p>Standar PC + AERadio Professional</p> <p>If you prefer to run your AERadio Professional in a standard PC, you have this option at your disposal. Please remember that, in any case, manufacturer's guarantee for the machine and components will be valid. AERadio works perfectly with tactile screens, making user's work much easier by handling software with his own hands.</p>

Immediate delivery ready-to-use for your Company, City Halls, Radio Stations, Shops, Learning Centers, High Schools and Universities.
